QUESTION 1

The /u02 directory containing Oracle Homes (OH) is 80% utilized and you need to free up space in it. You own two Oracle Homes OH193_A and OH193_B with test databases 193A and 193B, respectively. You decide to consolidate both

databases into a single Oracle Home (OH193_A) to free up space.

Which two actions must you perform? (Choose two.)

- A. Schedule a downtime window with the team using the 193B database.
- B. Copy the sqlnet.ora and spfile from OH193_B to OH193_A and restart PDBs.
- C. Create a new container database under OH193B and migrate the Pluggable Databases (PDBs) from 193B to 193A.
- D. Use the Move Database option from the console to relocate the database to the target Oracle Home.

Correct Answer: AD

QUESTION 2

Which two actions does the Cloud Exadata Infrastructure Resource NOT allow you to do? (Choose two.)

- A. Providing customers access to the Exadata Storage servers
- B. Allowing customers to schedule Automatic Infrastructure maintenance
- C. Allowing customers to execute Infrastructure maintenance
- D. Enabling Database Compute and Storage server expansion

Correct Answer: CD

QUESTION 3

Which tool can be used to monitor a storage server in Exadata Database Service?

- A. dbaascli
- B. exacli
- C. OCI CLI
- D. ocpucli

Correct Answer: B

QUESTION 4

Which is NOT an Oracle best practice for updating Virtual Machine DB System databases?

- A. Run the precheck operation before you apply any update.
- B. Patch the DB System before updating a database for DB Systems with Grid Infrastructure/ASM storage management.
- C. Back up your databases before you apply any updates to your system.
- D. Ensure all servers and database instances are stopped before applying patch to your DB system to avoid data corruption.

Correct Answer: D

QUESTION 5

Which service is used by default by the MySQL Database Service to store user data to make it more resistant to failures?

- A. OCI Data Safe
- B. OCI File Storage
- C. OCI Object Storage
- D. OCI Block Volumes

Correct Answer: D
