QUESTION 1

What is the minimum number of received SMS messages that a JTUI device must be able to concatenate?

- A. no minimum
- B. 5
- C. 3
- D. 10
- E. 32

Correct Answer: C

QUESTION 2

Which three statements are true regarding the handling of wireless connections? (Choose three.)

- A. Network connections should never be performed on a separate thread, so problems can be handled quickly.
- B. Performing network operations on the same thread used by the display is likely to block refreshes of the display until the network operations complete.
- C. The connection could unexpectedly terminate while processing the input or output streams.
- D. Devices can only support one HttpURLConnection at a time; therefore, network access from multiple threads must be serialized.
- E. A network connection could interfere with other services on the device, such as the ability to receive phone calls or SMS on a phone.

Correct Answer: BCE

QUESTION 3

A MIDP 2.0 compliant device creates an HTTP connection to a server that supports HTTP 1.1. Which is true?

- A. The device definitely supports HTTP 1.1.
- B. The device definitely does NOT support HTTP 1.1.
- C. The device may or may NOT support HTTP 1.1.
- D. There is no such thing as a 1.1 version of HTTP.

Correct Answer: A

QUESTION 4

Which two events can result in the removal of a MIDlet's dynamic push connection registration? (Choose two.)

- A. Using a call to `PushRegistry.removeConnection()`.
- B. Using a call to `PushRegistry.unregisterConnection()`.
- C. Opening the connection using `Connector.open()`.
- D. Using a call to `PushRegistry.registerConnection()`.
- E. When `MIDlet.destroyApp()` is called.
- F. When the MIDlet is uninstalled.

Correct Answer: BF

QUESTION 5

Which two specifications are mandatory in JTWI 1.0? (Choose two.)

- A. Location API
- B. MIDP 2.0
- C. WMA 1.1
- D. WMA 1.0
- E. MMAPI 1.1

Correct Answer: BC
