QUESTION 1

What are two advantages of using Configuration Management Tools? (Choose two.)

- A. reduction in policy violations caused by human errors
- B. reduction in administration costs
- C. reduction in network changes already performed automatically
- D. reduction of on-premises networking equipment
- E. reduction in networking team skills

Correct Answer: AB

Configuration Management Tools allow for automated configuration of networking equipment, which helps to reduce human errors and the time and money needed to manage and configure the equipment. For example, Cisco Configuration Professional (CCP) is a configuration management tool that provides automated configuration, validation, and troubleshooting of network infrastructure devices. CCP enables administrators to configure and deploy network changes quickly and efficiently, while also reducing the costs associated with manual configuration and troubleshooting.

QUESTION 2

AppDynamics is being used to monitor your distributed Python application. Each individual container of the application is instrumented with an AppD agent. Which two configuration variables uniquely determine the module being monitored? (Choose two.)

- A. node
- B. app
- C. agent
- D. tier
- E. event

Correct Answer: AD

Appdynamics Agents Install Wizard Step 2 Enter the configuration values...

QUESTION 3

What is chaos engineering?

- A. designing an application with fuzzy logic that makes it hard to predict

- B. a product engineering approach that lacks a formal methodology
- C. splitting a project between teams that do not communicate with each other
- D. introducing problems into a system to study behavior and improve reliability

Correct Answer: D

QUESTION 4

Which approach must be used to integrate DevOps practices into the team structure in an existing organization?

- A. Create a team that can deliver all the stages with active cooperation between the team members
- B. Create a team that can deliver all the stages with well-defined roles and a communication structure between team members
- C. Create a team for each stage with structured communication channels
- D. Create a team for each stage with active cooperation between the teams

Correct Answer: A

QUESTION 5

An application is being developed to be used by the HR department of a company on a global scale. The application will be used as a central repository for employee contracts. For user access, a RADIUS server will be used with authorized user groups.

Which action must be used to prevent developers from accidentally committing secrets in the code?

- A. Add a unit test to block the secrets
- B. Add a precommit Git hook to block the secrets
- C. Add dast to the repository to block the secrets
- D. Add a job in the CI build to block the secrets

Correct Answer: A
