QUESTION 1

You can configure Time Machine to delete versions of files as soon as they reach a specified age.

- A. True
- B. False

Correct Answer: B

QUESTION 2

How can you identify duplicate fonts?

- A. The OS X Mavericks installer can be downloaded from the Mac App Store for free.
- B. The Messages application allows for on-demand screen sharing that can be used even when the system screen sharing service isn't enabled.
- C. The Font Book application shows a small dot next to the name of any font that has duplicate resources.
- D. The four methods used to eject a volume or disk from the Finder are: Drag the disk icon to the Trash in the Dock. Press and hold the Eject key for a few moments to unmount and eject optical media. Select the volume you want to eject and choose Eject from the File menu. In the Finder sidebar, click the small Eject button next to the volume you want to unmount and eject.

Correct Answer: C

QUESTION 3

How do the four default System Preferences categories differ?

- A. The easiest method to configure VPN settings is to use a configuration profile containing all the relevant VPN setup information.
- B. During installation of OS X Mavericks, the only optional choice is to define an installation destination other than the Mac computer's current default system disk.
- C. Archive files are much simpler to create in the Finder and are compatible with third-party operating systems. Disk images are more difficult to create and manage, but they offer greater flexibility. Primarily, disk images can be easily modified and converted. However, OS X style disk images aren't compatible with third-party operating systems.
- D. Generally, Personal preferences affect only a single user; Hardware preferences adjust hardware and peripheral settings; Internet and Wireless preferences affect personal and system network settings; and System Preferences affect all users and often require administrative access.

Correct Answer: D

QUESTION 4

The Messages application allows for on-demand screen sharing that can be used even when the system screen sharing service isn't enabled.

- A. What options can you select from during the OS X Mavericks installation?
- B. Which application can provide on-demand screen sharing even when the Screen Sharing service isn't enabled?
- C. What application is used to manage keychain settings?
- D. Which optional firewall settings are available?

Correct Answer: B

QUESTION 5

What does CUPS do?

- A. PostScript Printer Description (PPD) files are printer driver files that instruct the CUPS system on how to communicate with specific printer models.
- B. Standard UNIX file system permissions allow only for permissions to be set for one owner, one group, and all others. ACLs, on the other hand, allow for an essentially unlimited list of permissions entries.
- C. Any application that supports Auto Save and the Finder can manage document locking.
- D. Common UNIX Printing System (CUPS) manages all printing for OS X, including both local and shared printing.

Correct Answer: D
