---

## QUESTION 3

A developer needs to classify a large number of images using IBM Watson Visual Recognition and submitting an image at a time can take a long time.

How can the efficiency of the service be improved?

- A. Specify only the classifiers you want results for in the classifier\_ids parameter.
- B. Specify a high minimum score threshold you want results for in the score parameter.
- C. Adjust the image's color resolution to be monochromatic (black and white).
- D. Resize images to be no larger than 1024 pixels in either width or height.

Correct Answer: D

---

## QUESTION 4

Which statement describes why more than one collection would need to be created in IBM Watson Discovery service?

- A. It is better to have multiple small collections than one big collection
- B. The first collection uses default configuration for testing and additional collections are needed for custom configurations
- C. To keep similar file types in their respective collections
- D. The data may be so different that it doesn't make sense for it all to be queried at once

Correct Answer: D
