QUESTION 2

Built into the IBM Watson Discovery service is the Watson Discovery News data set. How is this collection different from other collections?

- A. The Watson Discovery News configuration and documents cannot be adjusted
- B. Documents from the Watson Discovery News collection can be ingested as sample documents to better configure a private collection
- C. The Watson Discovery News collection is specific to the company news domain, whereas a collection is specific to a domain.
- D. The Watson Discovery News data set and a private collection can be queried with a single query call

Correct Answer: B

QUESTION 3

A university wants to build a virtual student adviser that can interact with prospective students to help answer any questions they may have on the admissions process. The students for the most part have similar questions, however there are a small number of international students who have very specific queries based on their native country and their background.

Which combination of IBM Watson services would meet these requirements?

- A. Natural Language Understanding and Personality Insights
- B. Natural Language Classifier and Visual Recognition
- C. Watson Assistant and Discovery
- D. Speech to Text and Tone Analyzer

Correct Answer: C

QUESTION 4

An AI FAQ widget on a company's support portal allows users to ask questions related to the company and its products.

Why is it important to analyze the user's input for entities?

- A. Specific content such as the location (Colorado) could be used to further inform the program.
- B. There must be an intent for each and every entity detected by the program.
- C. The number of entities found in the utterance could improve the accuracy of the answer.
- D. They could indicate variations in the flow of the dialog node.

Correct Answer: A

QUESTION 5

Which statement is a recommended practice when creating a chatbot with IBM Watson Assistant?

- A. Define different opening sentences in the dialog flow to prevent repetitive conversations where the dialog always asks the same questions
- B. Start with the dialog before defining any intents or entities
- C. Increase the amount of the transcribed text to improve the quality and confidence of the extracted concepts
- D. Use a separate workspace for each intent

Correct Answer: A
