**QUESTION 1**

Which of the following statements about the Policy Check feature on FortiManager is true?

- A. It provides recommendation to combine similar policy packages within a ADOM into one single policy package.
- B. It compares the policy packages with the revision history, and updates policy packages in the ADOM database.
- C. It provides recommendation for optimizing policies in a policy package.
- D. It merges and creates dynamic mapping for duplicate objects used in a policy package.

Correct Answer: C

---

**QUESTION 2**

How are the points calculated when using FortiMeter to deploy FortiOS-VM? (Choose two.)

- A. Based on the number of sessions on the mgmt interface of FortiOS-VM.
- B. Based on the FortiGuard service option enabled for FortiOS-VM.
- C. Based on the traffic usage on port1 and port2 on FortiOS-VM.
- D. Based on the amount of traffic (per GB) passing through the FortiOS-VM.

Correct Answer: BD

---

**QUESTION 3**

View the following exhibit:

### Import Device - Local-FortiGate [root]

Create a new policy package for import.

Policy Package Name	Local-FortiGate
Folder	root
Policy Selection	<input checked="" type="radio"/> Import All (3) <input type="radio"/> Select Policies and Profile Groups to Import
Object Selection	<input type="radio"/> Import only policy dependent objects <input checked="" type="radio"/> Import all objects

An administrator is importing a new device to FortiManager and has selected the shown options.

What will happen if the administrator makes the changes and installs the modified policy package on this managed FortiGate?

- A. The unused objects that are not tied to the firewall policies will be installed on FortiGate.
- B. The unused objects that are not tied to the firewall policies will remain as read-only locally on FortiGate.
- C. The unused objects that are not tied to the firewall policies in policy package will be deleted from the FortiManager database.
- D. The unused objects that are not tied to the firewall policies locally on FortiGate will be deleted.

Correct Answer: A

#### QUESTION 4

What is the purpose of the Policy Check feature on FortiManager?

- A. To find and merge duplicate policies in the policy package.
- B. To find and provide recommendation to combine multiple separate policy packages into one common policy package.
- C. To find and delete disabled firewall policies in the policy package.
- D. To find and provide recommendation for optimizing policies in a policy package.

Correct Answer: D

#### QUESTION 5

What does the diagnose cdb check policy-assignment command do?

- A. Fixes incorrect ADOM-level object references based on the firewall policies.
- B. Internally upgrades existing ADOMs to the same ADOM version in order to clean up and correct the ADOM syntax.
- C. Verifies and checks dynamic mappings, and removes invalid dynamic mappings.
- D. Verifies and corrects global ADOM policy package assignments that have been disassociated from an ADOM.

Correct Answer: C
