QUESTION 1

An administrator wants to delete an address object that is currently referenced in a firewall policy. Which one of the following statements is true?

- A. FortiManager will replace the deleted address object with the all address object in the referenced firewall policy.
- B. FortiManager will disable the status of the referenced firewall policy.
- C. FortiManager will not allow the administrator to delete a referenced address object.
- D. FortiManager will replace the deleted address object with the none address object in the referenced firewall policy.

Correct Answer: D

QUESTION 2

View the following exhibit:

Import Device - Local-FortiGate [root]

Create a new policy package for import.

Policy Package Name	Local-FortiGate
Folder	root
Policy Selection	<input checked="" type="radio"/> Import All (3) <input type="radio"/> Select Policies and Profile Groups to Import
Object Selection	<input type="radio"/> Import only policy dependent objects <input checked="" type="radio"/> Import all objects

An administrator is importing a new device to FortiManager and has selected the shown options.

What will happen if the administrator makes the changes and installs the modified policy package on this managed FortiGate?

- A. The unused objects that are not tied to the firewall policies will be installed on FortiGate.
- B. The unused objects that are not tied to the firewall policies will remain as read-only locally on FortiGate.
- C. The unused objects that are not tied to the firewall policies in policy package will be deleted from the FortiManager database.
- D. The unused objects that are not tied to the firewall policies locally on FortiGate will be deleted.

Correct Answer: A

QUESTION 3

What configuration setting for FortiGate is part of a device-level database on FortiManager?

- A. Routing
- B. Security profiles
- C. VIP and IP Pools
- D. Firewall policies

Correct Answer: D

QUESTION 4

Which of the following are included in the FortiManager backup? (Choose two.)

- A. Global database
