**QUESTION 1**

An administrator has configured the following command on FortiManager:

```
config system dm
set rollback-allow-reboot enable
end
```

A configuration change has been installed from FortiManager to the managed FortiGate that causes the FGFM tunnel to go down for more than 15 minutes. What is the purpose of this command?

- A. It allows FortiGate to reboot and recover the previous configuration from its configuration file.
- B. It allows FortiGate to unset central management settings.
- C. It allows the FortiManager to revert and install a previous configuration revision on the managed FortiGate.
- D. It allows FortiGate to reboot and restore a previously working firmware image.

Correct Answer: A

---

**QUESTION 2**

Which of the following statements are true regarding schedule backup of FortiManager? (Choose two.)

- A. Can be configured from the CLI and GUI.
- B. Does not back up firmware images saved on FortiManager.
- C. Backs up all devices and the FortiGuard database.
- D. Supports FTP, SCP, and SFTP.

Correct Answer: AD

---

**QUESTION 3**

As a result of enabling FortiAnalyzer features on FortiManager, which one of the following statements is true?

- A. FortiManager can be used only as a logging device.
- B. FortiManager will enable ADOMs automatically to collect logs from non-FortiGate devices.
- C. FortiManager will send the logging configuration to the managed devices so the managed devices will start sending logs to FortiManager.

D. FortiManager will reboot.

Correct Answer: C

---

**QUESTION 4**

What does a policy package status of Conflict indicate?

- A. Policy package configuration has been changed on both FortiManager and the managed device independently.
- B. The policy package reports inconsistencies and conflicts during a Policy Consistency Check
- C. The policy package doesn't have a FortiGate as the installation target.
- D. Policy configuration has never been imported after a device was registered on FortiManager

Correct Answer: B

---

**QUESTION 5**

What does the diagnose cdb check policy-assignment command do?

- A. Fixes incorrect ADOM-level object references based on the firewall policies.
- B. Internally upgrades existing ADOMs to the same ADOM version in order to clean up and correct the ADOM syntax.
- C. Verifies and checks dynamic mappings, and removes invalid dynamic mappings.
- D. Verifies and corrects global ADOM policy package assignments that have been disassociated from an ADOM.

Correct Answer: C

---

**QUESTION 6**

An administrator ran the reload failure command; diagnose test deploymanager reload config on FortiManager. What does this command do?

- A. It compares and provides differences in configuration on FortiManager with the current running configuration of the specified FortiGate.
- B. It installs the provisioning template configuration on the specified FortiGate.
- C. It downloads the latest configuration from the specified FortiGate and performs a reload operation on the device database.
- D. It installs the latest configuration on the specified FortiGate and updates the revision history database.

Correct Answer: C

---

## QUESTION 7

View the following exhibit: Which of the following statements are true if the script is executed using Device Database option? (Choose two.)

**Create New Script**

Script Name

Comments  0/255

Type

Run script on

[\[View Sample Script\]](#)

Script details

```

config router prefix-list
edit public
config rule
edit 1
set prefix 0.0.0.0/0
set action permit
next
edit 2
set prefix 8.8.8.8/32
set action deny
end
                    
```

Advanced Device Filters >

OK

Cancel

- A. The Device Settings Status will be tagged as Modified
- B. Successful execution of script on Device Database will create a new revision history
- C. The script history will show successful installation of script on the remote FortiGate
- D. You must install these changes using Install Wizard to a managed device

Correct Answer: BC

## QUESTION 8

Which of the following statements are true regarding reverting to previous revision version from the revision history? (Choose two.)

- A. To push these changes to a managed device, it required an install operation to the managed FortiGate.
- B. Reverting to a previous revision history will generate a new version ID and remove all other history versions.
- C. Reverting to a previous revision history will tag the device settings status as Auto-Update.
- D. It will modify device-level database

Correct Answer: AD

**QUESTION 9**

View the following exhibit:

Import Device - Local-FortiGate [root]

When importing configuration from this device, all enabled interfaces require a mapping to an ADOM Level interface. Note, the same ADOM Level interface can map to different interfaces on the each device.

Device Interface	ADOM Interface
port1	WAN
port3	LAN

Add mappings for all unused device interfaces

Next > Cancel

An administrator used the value shown in the exhibit when importing a Local-FortiGate into FortiManager. What name will be used to display the firewall policy for port1?

- A. port1 on FortiGate and WAN on FortiManager
- B. port1 on both FortiGate and FortiManager
- C. WAN zone on FortiGate and WAN zone on FortiManager
- D. WAN zone on FortiGate and WAN interface on FortiManager

Correct Answer: A

**QUESTION 10**

An administrator is unable to log in to FortiManager. Which one of the following troubleshooting step should you take to resolve the issue?

- A. Make sure FortiManager Access is enabled in the administrator profile.
- B. Make sure ADOMs are enabled and the administrator has access to the Global ADOM.

C. Make sure Offline Mode is disabled.

D. Make sure the administrator IP address is part of the trusted hosts.

Correct Answer: D
